EFFICIENT BUTTERING

The Millitec Table Top Butterer consists of a double conveyor belt assembly, a butter box, and an optional heated hopper.

The Butterer spreads whipped and aerated butter, margarine or other spreads. The unit is refillable during operation and spreads full width. Spread thickness and product thickness are also adjustable.

This portable butterer is suitable for small-scale production and catering. It guarantees perfect and even buttering, making it a convenient choice for food production.

KEY FEATURES

- Compact design
- Speeds up to **60 units** per minute per lane (120 units/ minute in total)
- Up to 30 mm height adjustment
- Suitable for bread slices and soft rolls
- Quick release rollers
- Rapid strip-down and cleaning
