

Introduction

Introduction

The whole coffee beans roaster adopts laser cutting technology and the frame is welded as a whole, more solid and stable than ordinary screw fixing, parts not easy to loosen or have structural deformation. The coffee beans roaster can be connected to the computer by USB line or bluetooth to output the roasting curve, supporting Artisan software, bringing more accurate operation to your roasting.

Characteristics

- ◆ Dual Omron thermostats, temperature display is more sensitive and accurate.
- ◆ Omron timer, it is convenient to check the roasting time.
- ◆ Electronic damper control, through the knob to change the speed of the exhaust motor, thereby changing the exhausted air volume, realizing stepless control.
- ◆ Siemens APT industrial button, the mechanical life is up to 1 million times. Press the button to have 5 different colors of light, not only beautiful, but also easier to operate and identify.
- ◆ Super large flame observation window, watching the fire clearly.
- ◆ High-quality rosewood sampling handle, combined with artificial mechanics design, making your sampling more comfortable.
- ◆ 304SS material hopper, reasonable and compact design, with just a light push, the coffee beans can quickly fall into the roller.
- ◆ With a coffee bean observation window, you can observe the roasting process lively.
- ◆ The cooling pan discharging device is user-friendly. Coffee beans can be easily unloaded.
- ◆ The independent cooling fan, combined with the stirring blade, can quickly cool the roasted coffee beans.
- ◆ LCD touch screen can generate the roasting curve lively, more direct to know the roasting process. Roasting temperature, drum speed, hot air fan volume can be controlled in the screen.
- ◆ Various models for choosing. Most coffee roasters are for home use, 1kg 2kg 3kg model, coffee shops use normally starting from 6kg model, planting farms generally using 3kg 6kg 10kg and so on. Larger models like 15kgs, 30kgs, 60kgs 100kgs are also available.
- ◆ Exported to Germany, the US, Mexico, Colombia, Brazil, Honduras, Indonesia, the Philippines, etc and export about 200 sets every year.
- ◆ Short delivery time, 3-7days to ship, except new batch machine materials need to process and the delivery time is no more than 1month.

Customization Supported

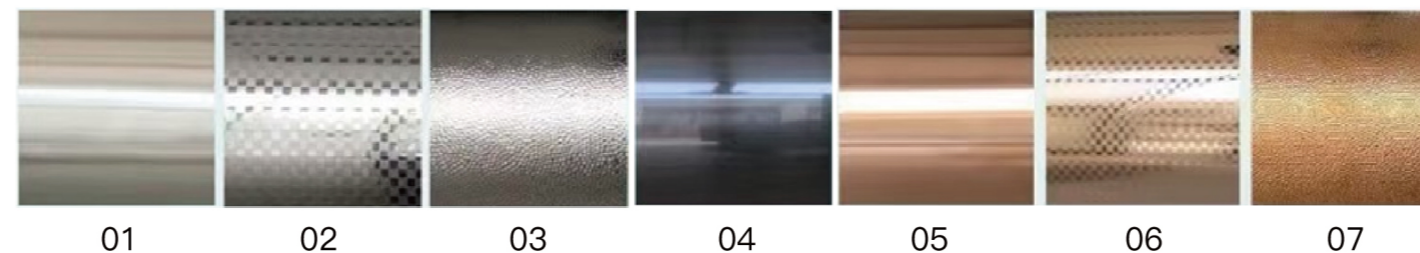

Body color customization:

Black, White, Red, Purple;

Rotary drum layer and material customization:

Single layer & Double layer, Carbon steel & stainless steel;

Rotary drum cover style customization:
